1/25/69

Dear Paul and Gary,

I'm home, too busy to write, with about 17,500 words of my analysis of the new material written. It is more spectacular than I've told you, as I learn as I get. Wecht agrees. Unless Vince opposes it, which I do not anticipate, we'll soon be back in court with it. Wecht is associating himself with us. I've sent him copies and he has read enough to see what is there.

Bud and Vince are coming here tomorrow. I have to mail something to N.O. so I write this brief note. I've gotten P's letterto Moo and Gary's Fred enclosures.

There really is nothing left of the WR save the problem of getting attention to what I now have. There was metal in the bneck "region" and both sets of doctors knew it. The fatal head would hit in the <u>top</u> and the autopsy doctors lied by 300%. Need more. I have it too, and you'll get it when this draft is typed. You are also getting mimeographed copies of all the papers. Bud has done that. I have Xeroxes for you, but he now thinks we may need them in court.

The second instalment of Gary's papers, quite a bundle, have just arrived.

Hurriedly.

H
